

## **CS 307: Systems Practicum**

### **Assignment 7: NFS**

**To be done in class groups; due: by 11:59 PM on 7th Mar 2024**

Q1. Please setup an NFS between the client and server using this tutorial:

<https://vitux.com/install-nfs-server-and-client-on-ubuntu/>

Now, Please create or save a file in the export folder of the NFS host server. Now, open the mount folder on the client machine; you should be able to view the same file shared and accessible in this folder. [3]

*Hint:*

If you want to read a more elaborate example of these steps, please refer to:
